***which four families, in four different cities, over four centuries, make the same delicious dessert: blackberry fool. This richly detailed book ingeniously shows how food, technology, and even families have changed throughout American history. In 1710, a girl and her mother in Lyme, England, prepare a blackberry fool, picking wild blackberries and beating cream from their cow with a bundle of twigs. The same dessert is prepared by an enslaved girl and her mother in 1810 in Charleston, South Carolina; by a mother and daughter in 1910 in Boston; and finally by a boy and his father in present-day San Diego. Kids and parents alike will delight in discovering the differences in daily life over the course of four centuries. Includes a recipe for blackberry fool and notes from the author and illustrator about their research. A young African-American girl is traumatized when a gang attacks her and her brother on their way home from school and spray-paints her face white. Based on a true story. This book questions how language in various mediums (television/radio/internet/the press) might be accused of constructing a language of a white supremacy of ideas and politics. An absorbing narrative supported by a number of previously unpublished period photographs shows how a city that was once part of Mexico itself came of age through appropriating the region's connections to Mexican places and people. Reprint. The information inside of this book is vital for the lives of people of color. This book only serves as the first step in our life-long journey of self-REdiscovery. ***It's the pesticide on our dinner plates, a chemical so pervasive it's in the air we breathe, our water, our soil, and even found increasingly in our own bodies. Known as Monsanto's Roundup by consumers, and as glyphosate by scientists, the world's most popular weed killer is used everywhere from backyard gardens to golf courses to millions of acres of farmland. For decades it's been touted as safe enough to drink, but a growing body of evidence indicates just the opposite, with research tying the chemical to cancers and a host of other health threats. In Whitewash, veteran journalist Carey Gillam uncovers one of the most controversial stories in the history of food and agriculture, exposing new evidence of corporate influence. Gillam introduces readers to farm families devastated by cancers which they believe are caused by the chemical, and to scientists whose reputations have been smeared for publishing research that contradicted business interests. Readers learn about the arm twisting of regulators who signed off on the chemical, echoing company assurances of safety even as they permitted higher residues of the pesticide in food and skipped compliance tests. And, in startling detail, Gillam reveals secret industry communications that pull back the curtain on corporate efforts to manipulate public perception. Whitewash is more than an exposé about the hazards of one chemical or even the influence of one company. It's a story of power,***

*politics, and the deadly consequences of putting corporate interests ahead of public safety. Harold Weisberg's Whitewash was originally self-published in 1965, at a time when few publishing houses would consider a book challenging the Warren Report. Written in Harold's fiercely passionate yet scrupulously honest style, and relying on the government's own evidence and documentation, Whitewash destroys the Warren Commission's claims about Oswald and shows that the Commission knowingly engaged in a cover-up. Weisberg diligently researched the government's unpublished evidence and played a major role in forcing disclosures via the Freedom of Information Act. A watershed publication and one that established the author as one of the premier JFK assassination researchers, Whitewash (as well as the subsequent books in the Whitewash series) has become of the essential assassination publications, and nearly five decades later his work has lost none of its bite. From the Publisher: The Middle Eastern question lies at the heart of the most pressing issues of our time: the war in Iraq and on terrorism, the growing tension between preservation of our national security and protection of our civil rights, and the debate over immigration, assimilation, and our national identity. Yet paradoxically, little attention is focused on our domestic Middle Eastern population and its place in American society. Focusing on the contemporary immigration debate, the war on terrorism, media portrayals of Middle Easterners, and the processes of creating racial stereo-types, Tehranian argues that, despite its many successes, the modern civil rights movement has not done enough to protect the liberties of Middle Eastern Americans. *concepts of whiteness have transformed over time, Whitewashed forces readers to rethink and question some of their most deeply held assumptions about race in American society. This book is a reconsideration of the practice of whitewashing church interiors during the Protestant Reformation in the sixteenth and seventeenth centuries. It is the first detailed study of its kind which challenges the view that whitewash was always only a 'cheap coat of paint'. Victoria George pulls together several histories: of the colour white from the biblical period to the present, and ideas about the colour white in philosophy, theology, art, and architecture from antiquity to the present. She links them to case studies of the ways in which reformers Huldrych Zwingli and John Calvin thought about colour in a careful analysis of the role of colour-thinking in their theological writings. The social meanings embodied in the word, 'whitewash' as it entered the printed media in the 17th century is explored as part of a chapter on the history of whitewashing itself. The long-term symbolic and aesthetic implications of the practice of whitewashing are examined in the larger context of material culture; in terms of their value as a metaphor, for both the Reformed Protestant and the Catholic in opposition to them; and for the uses to which whitewash has been put over time. George proposes that the practice was not only visually transformative but held importance for religious aesthetics as an agent of change, and for an aesthetics of minimalism generally, especially evident in the twentieth and twenty-first centuries.*

***religion and the arts at the University of Richmond in Virginia. Nicholas Alan Cope's photographs evoke a unique vision of Los Angeles and its contrasts as seen exclusively through its everyday architecture. Searching for the sublime core of the city's true nature, Cope strips away the extraneous, and focuses on the sheer beauty and simplicity of the cityscape. To an outsider, the profound cultural, historical, and architectural imprint of the City of Angels can be lost amongst the unsightly sprawl of stucco, strip malls, and irrelevant adornment. While the sunlight can be unforgiving and harsh, bleaching the landscape into a pale hue, the allure, for Cope, lies in the consistency and ubiquity of the buildings combined with the severity of the light accentuating the dramatic elegance of the architecture. Whitewash utilizes the whitest whites, the blackest blacks, and the modern and stark architecture of an idealized future that never arrived to tell the visual story of LA's uniquely conflicted soul. North Americans are some of the least healthy people on Earth. Despite advanced medical care and one of the highest standards of living in the world, one in three Americans will be diagnosed with cancer in their lifetime, and 50 percent of US children are overweight. This crisis in personal health is largely the result of chronically poor dietary and lifestyle choices. In Whitewash, nutritionist Joseph Keon unveils how North Americans unwittingly sabotage their health every day by drinking milk, and he shows that our obsession with calcium is unwarranted. Citing scientific literature, Whitewash builds an unassailable case that not only is milk unnecessary for human health, its inclusion in the diet may increase the risk of serious diseases including:***
